

Life Molecular Imaging GmbH is the German based Research & Development (R&D) organization of Life Molecular Imaging S.A. Switzerland, a wholly owned subsidiary of Alliance Medical Group Limited. Our vision is to build our position as an innovator and leading player in the Molecular Imaging field. We aim to create value for patients & physicians by improving early detection and characterization of chronic and life-threatening diseases leading to better therapeutic outcomes and improved quality of life.

For our approved PET tracer NeuraCeq and our pipeline of tracers in clinical development we offer the following full-time position located in the United States:

Network Management and Technology Transfer (m/f) PET-Radiopharmaceuticals – US

Main Tasks & Responsibilities:

- Develop a thorough understanding of Life Molecular Imaging's chemistry as well as manufacturing and testing procedures
- Manage contract manufacturing partners in North America (US/CAN) in close interaction with the Berlin, Germany Life Molecular Imaging team
- Perform monitoring of routine production KPI's and troubleshooting
- Manage multiple complex technology transfer projects (implementation of manufacturing and testing procedures to new contract manufacturing sites) related to the manufacturing and testing of current and new radiopharmaceuticals
- Review validation documents and batch records
- Preparation and revision of CMC documents for regulatory filings (FDA)
- Identify and implement process changes and continuously improve manufacturing process

Skills:

- Ability to work effectively in a team environment
- Attention to detail and quality orientation
- Solid understanding for regulated processes, in particular cGMP for PET tracer (21 CFR Part 212, USP 823)
- Self-starter with a high degree of endurance, flexibility and mobility (20-30% traveling)
- Open-minded and motivating attitude
- Computer skills, in particular Word and Excel
- Fluency in English

Experience:

- University degree in Chemistry, Biology, or Pharmacy preferably a PhD
- Several years of experience in PET radiopharmaceutical research/ development
- Experience in managing collaborations and vendors

If you want to become part of an entrepreneurial team, if you are prepared to assume a wide range of responsibilities and if your background and personal experience fits this profile, please send us your complete application (Cover letter detailing your interest in this position including your past relevant research and work experience, CV, publication list) as a single pdf document to:
