

Life Molecular Imaging (LMI), part of the Life Healthcare Group, is an innovator and leading player in the Molecular Imaging field. We aim to create value for patients and physicians by improving early detection and characterization of chronic and life-threatening diseases leading to better therapeutic outcomes and improved quality of life. For our approved PET tracer Neuraceq and our pipeline of tracers in clinical development we offer the following full-time position:

## Head of Medical Affairs-Americas (m/f/d)

### Job Responsibilities

You will lead all brand-related medical activities as well as guide and support all scientific & medical marketing activities of LMI's Marketing & Sales organization in the US, Canada and South America. Moreover, you will develop relationships with Key Opinion Leaders in both the Alzheimer's and the Nuclear Medicine domain. This activity also includes representing LMI at key conferences and meetings as well as at Patient Advocacy groups. You will be responsible for medical communication and for conducting external and internal trainings. You should be self-driven, outgoing and enthusiastic about Amyloid-Beta and Tau PET Imaging. Furthermore, you should enjoy extensive travel and a high level of responsibility.

Further activities include but are not limited to:

- Develop and drive a medical strategy in the face of Alzheimer's disease modifying drugs being approved with expected subsequent PET tracer reimbursement
- Work and coordinate with research and clinical teams on medical publication activities
- Drive the medico-scientific differentiation of LMI development projects (jointly with Clinical Development function) and the clinical profiling of launch candidates from a medical practice perspective (jointly with Marketing and HEOR functions)
- Provide input for project/brand specific labeling activities (support Regulatory Affairs)
- Oversee and steer LMI's Research Collaboration Program
- Support LMI's pharmacovigilance procedures and compliance program

### Job Requirements

- Advanced Clinical/Science Degree required (e.g., MD, PharmD, PhD in relevant scientific area(s))
- Ideally Medical Doctor in neurocognitive impairment OR Radiology/Nuclear Medicine with significant experience in Medical Affairs (ideally including neuro-imaging)
- At least 5 years of Pharma industry experience (ideally Medical Affairs)
- Experience in the fundamentals of nuclear medicine and radiopharmaceutical development would be beneficial
- Ability to transfer scientific results into a differentiated value proposition for practitioner, patients, and payers
- Experience working in an entrepreneurial biotech environment
- Self-motivated. Able to build and manage a Medical Affairs team
- Outgoing and enthusiastic. Able to engage, converse and motivate KOLs
- Willingness to travel extensively
