

Life Molecular Imaging GmbH is the German based Research & Development (R&D) organization of Life Molecular Imaging S.A. Switzerland, a wholly owned subsidiary of Alliance Medical Group Limited. Our vision is to build our position as an innovator and leading player in the Molecular Imaging field. We aim to create value for patients and physicians by improving early detection and characterization of chronic and life-threatening diseases leading to better therapeutic outcomes and improved quality of life.

The Quality Assurance department at Life Molecular Imaging GmbH invites applications for the following full-time, flexible location position with immediate effect:

Quality Assurance Manager (m/f/d)

The main goal of our company is to develop and market new innovative Positron Emission Tomography (PET) tracers.

Key Tasks and Responsibilities:

- Establish, manage, and oversee quality related aspects of the relationship with pharma partners
- Qualify and manage contract manufacturing partners and suppliers including assessment for suitability and compliance to the applicable GXP regulations and supervision for continuing compliance
- Perform and follow-up GMP-audits at contract manufacturing partners and suppliers world-wide
- Implement national and international GMP principles for the production and distribution of supported radiopharmaceuticals based on applicable regulations, guidelines and industry standards
- Maintain a robust quality management system for a portfolio of projects which includes management of deviations, OOS-results, change control requests, CAPAs and technical complaints
- Support and further develop internal quality documents and standard operating procedures

Skills:

- Independent and proactive with a high degree of endurance, flexibility, and mobility (15-20% traveling)
- Attention to detail and quality orientation
- Excellent communication, negotiation, and interpersonal skills
- Ability to work effectively in a team environment
- Quality oriented and strong organizational skills
- Open-minded and motivating attitude
- Proficiency in computer-based systems, including Microsoft Office is required for daily work and collaboration
- Fluency in English

Experience:

- University or academic degree in a science field (chemistry, biology, pharmacy or equivalent)
- Minimum of 3 years quality assurance experience in a global pharmaceutical environment, preferably in contract manufacturing or radiopharmaceutical production
- Solid GMP background and experience working in a regulated environment is important to success in this position
- Experience in conducting audits desirable

We offer flexible work arrangements and the possibility to work home-based. This position reports directly to the Head of Quality Management, who is located in the headquarter of Life Molecular Imaging GmbH in Berlin, Germany. We offer a competitive salary in an international environment.

If you want to become part of an entrepreneurial, international and interdisciplinary team, are prepared to assume a wide range of responsibilities, and your background and personal experience fits this profile, please send us your complete application (cover letter detailing your interest in this position including your resume) as a single pdf document to:
